**Subject:** Get your fat asses out of the free market !!!

To whom it may concern,

The total and unfounded harassment by this increasingly socialist government has got to end. This latest travesty against Microsoft is pure bullshit and will continue to weaken one of the best job creating businesses the country still has. The companies that have pushed to keep harassing Microsoft should get out of the free market system and go to China if they need the government to carry them. If the government is really interested in looking into monopolies, how about starting with the public school system, which is REALLY a monopoly !!!!!
